

ACTIVITY 27

Directions: Fill in the chart using Y for yes or N for no as you solve the puzzle.

| | pond | river | lake |
|---|------|-------|------|
|  | | | |
|  | | | |
|  | | | |

None of these fish lives in the same place. Use the clues and the chart to find their homes.

1. The smallest fish has the longest home.
2. The spotted fish's home is not the smallest.

Answers

Page 27

| | pond | river | lake |
|---|----------------|----------------|----------------|
|  | N ₁ | Y ₁ | N ₁ |
|  | Y ₂ | N ₁ | N ₂ |
|  | N ₂ | N ₁ | Y ₂ |

Clue 1 says that the smallest fish has the longest home.

A river is the longest of the three homes, so the smallest fish lives in the river. Clue 2 says that the spotted fish's home is not the smallest.

Since a pond is smaller than a lake, the spotted fish must live in the larger of the two, the lake. The medium-sized fish lives in the pond.
