

## Each Has Two Jobs

Roberta, Steve, Thelma, and Vince each have two jobs. Listed alphabetically, the jobs are chef, heavy equipment operator, nurse, police officer, professional wrestler, security guard, teacher, and waiter. Read the clues to find the two jobs for each person.

1. Roberta, the chef, and the police officer all went golfing together.
2. Vince never had any education past the ninth grade.
3. The nurse was assigned to desk duty when he sprained his ankle.
4. The chef's husband is the heavy equipment operator.
5. Roberta is not the professional wrestler.

	Roberta	Steve	Thelma	Vince
chef				
heavy equipment operator				
nurse				
police officer				
professional wrestler				
security guard				
teacher				
waiter				

# Answers

p. 2

NAME	JOB 1	JOB 2
Roberta	security guard	teacher
Steve	nurse	police officer
Thelma	chef	professional wrestler
Vince	heavy equipment operator	waiter

The nurse is a man (3) but isn't Vince (2), so he is Steve. The chef is a woman (4) but isn't Roberta (1), so she is Thelma. Then Thelma (chef) isn't the police officer (1), and neither is Roberta (1) or Vince (2), so Steve is the police officer. Steve's two occupations are now accounted for, so the other two male occupations that must be held by men are Vince's. These are the heavy equipment operator (4, male) and the waiter (male, since "waitress" would be female). Now both men's occupations are accounted for, so the remaining occupations are the women's. Roberta is not the professional wrestler (5), so Thelma is. Then Roberta's two occupations are security guard and teacher.
